

Greaves Family of Stepney, London, England, and
 Descendants of Rear Adm. Thomas Graves of Charlestown, MA (Gen. 28)
 (Gen. 11 Dec. 2017)

NOTE: This chart shows some lines of descent only, where the focus is on using Y-DNA analysis to confirm the Greaves surname. It does not show all lines of descent. It is assumed that the common ancestor also had other sons, and all lines up to and including the common ancestor have been given the same color. All groups with the same color share the same DNA test results. If a group has a different color, it indicates a mutation from the ancestral haplogroup. A mutation that is in red indicates a mutation from the ancestral haplogroup, and means further DNA test is advised.
