(Rev. 23 Feb. 2013)

**NOTES:** The charters only list of descent only, since the form is on using Y-DNA analysis to trace the Graves surname.  
The number in each name column is the DNA test ID.  
When two descendants of a common ancestor have exactly the same DNA test results, it is assumed that the common ancestor did not have any other sons and including the common ancestor here has given the same value as those with the same value have the same DNA test results.  
List of names: 001-11 of the 12 numbers represent the individual's original birthplace.  
In addition, the 12-19 numbers in a number from the ancestral birthplace, and mean number 13 had a value of 19.
