NOTES: This chart shows male lines of descent only, since the focus is on using Y-DNA analysis to trace the Graves surname. The number in each bottom colored box is the DNA test ID. All boxes with the same color have the same DNA test results. 24 of 25 means that 24 of the 25 DNA markers matched the inferred ancestral haplotype. A notation like 13-19 indicates a mutation from the ancestral haplotype, and means marker 13 had a value of 19. When a mutation is colored red, that means that mutation seems to be common for all descendants of this particular subgroup. Now that more advanced tests like Big Y are available, those results are being added to this chart. (It would be helpful for many more people to take a Big Y test.) The line under Big Y, for those kits that have taken that test, is the name of the terminal (most recent) SNP for that kit. Based on DNA test results, the following genealogies are part of this same family:

- genealogy 441, John R. Graves of TN, KY & IL, b.c. 1790
- genealogy 106, John Samuel Graves of SC, b.c. 1780
- genealogy 403, Henry Graves of Ireland, IL & MN, b. 1835
- genealogy 591, Richard Graves of Dublin, b.c. 1795
- genealogy 928, John Graves of TN & NC, b.c. 1851
